Training and Evaluation Outline Report

Status: Approved 21 Oct 2015 Effective Date: 26 Aug 2020

Task Number: 10-PLT-0236

Task Title: Conduct Composite Supply Company Petroleum Platoon Headquarters Operations

Distribution Restriction: Approved for public release; distribution is unlimited.

Destruction Notice: None

Foreign Disclosure: FD3 - This training product has been reviewed by the developers in coordination with the CASCOM, Fort Lee, Virginia foreign disclosure officer. This training product cannot be used to instruct international military students.

Conditions: The Petroleum Platoon Headquarters has received an operations order (OPORD) from higher headquarters (HQ) to provide quality surveillance and control measures for fuel being stored and distributed by the platoon. The platoon operations are established in support of a higher HQ operational mission. The platoon has primary access to main supply routes, external logistical support, and it is accessible to all supported and supporting customers/units. Continuous digital and analog communications have been established. All applicable regulations, internal and external tactical standard operating procedures (TSOP), technical manuals (TMs), and field manuals (FMs) are on-hand as reference material. The platoon personnel have been provided guidance on rules of engagement for this mission. Threat capabilities include opposing forces which have the ability to gather information, interact with hostile force sympathizers, coordinate suicide bombings, set up improvised explosive devices, coordinate air support, and execute reinforced platoon/squad operations in a chemical, biological, radiological, and nuclear (CBRN) environment. Mission, enemy, terrain and weather, troops and support available-time available and civil considerations (METT-TC) identified constraints must be considered. The platoon is not likely to be attacked with hostile enemy fire or chemical agents. This task will be performed under all environmental conditions. All authorized equipment is on hand and operational. All section personnel are available to conduct all day and night operations. Specified time constraints are identified in the operations order. The section has adequate time to prepare. Unit leaders are present in the area of operations. Some iterations of this task should be performed in MOPP 4.

Standards: The Petroleum Platoon Headquarters provides quality surveillance and control measures for fuel being stored and distributed by the platoon with the use of all available equipment and personnel within the specified time constraints in the mission OPORD and in accordance with (IAW) the approved Army standards identified in the Task Evaluation Criteria Matrix which is included in this task below, commanders guidance, applicable internal and external TSOPs, and approved Army regulations.

LEADER STATEMENT: An Army leader is anyone who by virtue of assumed role or assigned responsibility inspires and influences people to accomplish organizational goals. Leadership is not limited to or synonymous with an assigned duty, position, or given rank as it also manifests itself in both informal and collective forms. Informal leadership provides knowledge, experience, and technical expertise while collective leadership results through the combined effects and synergies of leaders at different levels and experience collaborating to achieve a common purpose. Informal and collective leadership can include positions with an expanded scope of responsibility, significance and operational / mission implications. Therefore, for the purpose of training this task, Leaders are not only defined as officers, warrant officers, noncommissioned officers, and Army civilians but also include individuals who are Subject Matter Experts (SME) which possess the requisite knowledge and skill set to perform a particular task (i.e., conduct an operation, provide logistics, or operate specific equipment, etc.) at the tactical through strategic level as the situation and/or mission dictates.

Objective Task Evaluation Criteria Matrix:

Plan and Prepare			Ex	ec	ute			Assess						
Operation Environme SQD & PLT	al ent	Training Environment (L/V/C)	Leaders Present at Training/Required	Present at Training/Required	External Eval	Performance Measures	Critical Performance Measures	Leader Performance Measures	Evaluator's Observed Task Proficiency Rating	Commander's Assessment				
Dynamic			>=85%	. 200/	Yes	>=91%					2	>=90%	т	т
Dynamic (Single Threat)	Night	ΙΑΜ	75-84%		Se	80- 90%	All	80- 89%	T-	T-				
		IAW unit CATS statement	65-74%	75-79%		65- 79%			89%	Р	Р			
Static (Single Threat)			60-64%	60-74%	No	51- 64%		<=79%	Р-	Р-				
	Day		<=59%	<=59%		<=50%	<all< td=""><td>~=13/0</td><td>U</td><td>U</td></all<>	~=13/0	U	U				

Remarks:

Task steps and performance measures are arranged in a logical order and are not intended to be interpreted as a "required order" for performance. These task steps and/or performance measures of collective task may not always be applicable to every unit. Prior to evaluation, coordination should be made between the evaluator, the unit itself, and the evaluated units' higher headquarters (if required) to determine the task step(s) and/or performance measure(s) that may be omitted and/or must be performed. Training begins with the execution of pre-combat checks and inspections. Training ends when designated training objectives for the particular training events or exercises are performed to Army standard. Unit leadership should conduct an after action report (AAR) to determine future training requirements for the unit.

Task Evaluation Criteria Matrix Definitions:

Static: Aspects of operational variables (PMESII-PT) needed to stimulate mission variables (METT-TC) are fixed throughout the unit's execution of the

task.

Dynamic: Operational variables and Threat TTPs for assigned counter- tasks change in response to the execution of BLUFOR's task.

Complex: Requires a minimum of four (Terrain, Time, Military [Threat], and Social [Population]) or more operational variables; brigade and higher units require all eight operational variables (PMESII-PT) to be replicated in varying degrees based on the task being trained.

Single Threat: Regular, irregular, criminal, or terrorist.

Hybrid Threat: The diverse and dynamic combination of regular forces, irregular forces, terrorist forces, and/or criminal elements unified to achieve mutually benefitting effects.

To obtain a T or T- this task must be conducted in a dynamic and complex environment with 4 plus OE variables and a hybrid threat at night with 75% or more leaders present, greater than 80% of Soldiers present, receive a "GO" on 80% or more of the performance measures, ALL of the critical performance measures and at least 80% "GO" on the leader performance measures. Must be conducted during an external evaluation.

Task steps and measures were developed using the Plan, Prepare, Execute and Assess (PPEA) construct to reinforce the operations process and is implied throughout the T&EO as applicable.

Notes: REPORTING ERRORS AND RECOMMENDING IMPROVEMENTS: You can help improve this collective task. If you find any errors, or if you would like to recommend any improvements to the procedures in this collective task, please let us know. The preferred method is to submit a DA Form 2028 (Recommended Changes to Publications and Blank Forms) with your recommended changes via email to usarmy.lee.tradoc.mbx.cascom-g3-collective@mail.mil. Your recommended changes will be reviewed, validated to ensure approved Army or joint doctrine supports your recommendation(s), implemented as applicable, and a reply will be furnished to you.

Safety Risk: Low

Task Statements

Cue: The Petroleum Platoon has received an operations order (OPORD) from higher headquarters (HQ) to provide quality surveillance and control measures for fuel being stored and distributed by the platoon.

DANGER

Soldiers must constantly be alert for and avoid situations that may result in injury or death. At the training site, leaders must establish training safety overview procedures.

WARNING

Soldiers must be alert to human error and know the capabilities and limitations of the equipment and vehicles they use. Following the proper safety procedures preserves troop strength by preventing personnel losses through accidents.

CAUTION

The possibility of personal injury or damage to equipment that may result from long-term failure to follow correct procedures.

Performance Steps and Measures

NOTE: Assess task proficiency using the task evaluation criteria matrix.

NOTE: Asterisks (*) indicate leader steps; plus signs (+) indicate critical steps.

STEP/MEASURE	GO	NO-GO	N/A
+* 1. Fuel Platoon Headquarters Leaders manage fuel platoon operations.			
a. Provide technical guidance to section personnel.			
b. Provide quality surveillance and control measures for fuel being stored and distributed by the platoon.			
c. Maintain current status of petroleum dispensing equipment and drivers using MTS, radio, wire, or messenger.			
d. Monitor receipt, distribution, and retail issue of petroleum to ensure accuracy and accountability.			
e. Monitor fuel fleet workload status.			
f. Prepare records and reports for forwarding to Company Headquarters.			
g. Forward records and reports to the Company Headquarters in accordance with TSOP or command guidance.			
h. Monitor dispersion and camouflage of equipment.			
i. Monitor gauging of petroleum products IAW applicable regulations.			
+ 2. Fuel Platoon Headquarters Leaders monitor fuel storage and distribution operations.			
a. Monitor driver preventive maintenance checks and services (PMCS) on all fuel transport equipment and determine serviceability.			
b. Assign personnel to fuel distribution missions.			
c. Ensure that vehicle operators use night vision devices while operating fuel transport vehicles during hours of low visibility.			
d. Enforce safety procedures throughout fuel transport operations.			
e. Maintain situational awareness of transport operations using MTS.			
+ 3. Petroleum Storage Section personnel manage bulk fuels into tank transport or modular tank fuel farm when mission requires and available.			
a. Receive, store, and issue bulk petroleum.			
 Deploy two 120k FSSPs forward with crews to one or two BCT areas as required to support requirements. 			
c. Store up to 300K gallons of fuel in one 300k Fuel System Supply Point (FSSP).			
d. Employ safety procedures throughout receipt operations.			
e. Inspect petroleum fire fighting equipment for serviceability.			
f. Inspect petroleum storage equipment for leaks.			
g. Measure product volume IAW applicable regulations.			
h. Receive the required amount of fuel into the fuel transport vehicle or modular tank fuel farm when available.			
i. Send SITREP giving details of receipt operation to Platoon Headquarters using MTS, radio, messenger, or wire.			
j. Maintain a written record of receipts for accountability in accordance with TSOP.			
4. Petroleum Distribution Section personnel provide local fuel distribution operations.			
a. Augment BCTs with MFS as required.			
b. Provide FARE support of up to four (4) aircraft refuel points.			
c. Receive fuel delivery mission from Platoon Headquarters identifying the receiving unit(s), type and quantity of fuel, and the scheduled time and date of delivery.			
 d. Receive strip map/overlay of route of march to supported unit(s) location from Platoon Headquarters. 			
e. Maintain situational awareness at all times using MTS.			
+* 5. Leaders manage administrative functions as appropriate, directed, or required.			
a. Conduct troop leading procedures.			
b. Manage composite risk management assessments.			
c. Provide logistics status reports to higher HQ IAW TSOP.			
d. Maintain communications with higher HQ IAW TSOP.			
e. Monitor before, during, and after preventive maintenance checks and services (PMCS) on organic equipment.			
f. Manage Command Supply Discipline Program (CSDP).			
g. Enforce operations security (OPSEC) procedures at all times.		1	
h. Enforce operations security (OPSEC) procedures at all times.			

ί.	Enforce	safetv	regulations	and	established	unit's	internal	and	external	TSOP	's
••	LINOIOC	Juicty	regulations	unu	colubiloriou	unit 0	internui	unu	CAtomai	1001	0

j. Ensure that all Army sites and operations attain and sustain 100 percent compliance with environmental laws and regulations in a climate of changing requirements to prevent a notice of violation or a fine for not complying with following host nation, local, state, federal, higher headquarters environmental directives and policies.

Mission(s) supported: None

MOPP 4: Sometimes

MOPP 4 Statement: Chemical protective clothing ensemble and field protective mask restrict movement and activities. Wear MOPP gear only when threat forces have used CBRN weapons or are likely to do so. MOPP gear should be worn during CBRN training exercises. During MOPP training, leaders must ensure personnel are monitored for potential heat injury. Local policies and procedures must be followed during times of increased heat category in order to avoid heat related injury. Consider the MOPP work/rest cycles and water replacement guidelines in accordance with CBRN regulations.

NVG: Never

NVG Statement: Night vision goggles are not required to conduct this task. However, they may be required when conducting sustainment unit operations, during moment, or Soldier duties as assigned.

Prerequisite Collective Task(s): None

Supporting Collective Task(s):

Step Number	Task Number	Title	Proponent	Status
	10-CO-0003	Prepare Petroleum Laboratory for Certification	10 - Quartermaster (Collective)	Approved
	10-CO-0235	Conduct Company Petroleum Quality Surveillance Operations	10 - Quartermaster (Collective)	Approved
	10-SEC-0220	Conduct Bulk Petroleum Storage Operations	10 - Quartermaster (Collective)	Approved
	10-SEC-0237	Conduct Bulk Petroleum Distribution Section Operations	10 - Quartermaster (Collective)	Approved
	10-TM-0003	Conduct Petroleum Laboratory Operations	10 - Quartermaster (Collective)	Approved
	55-CO-0041	Transport Bulk Petroleum	55 - Transportation (Collective)	Approved

OPFOR Task(s): None

Supporting Individual Task(s):

Step Number	Task Number	Title	Proponent	Status
		Provide Petroleum Products using Refuel on the Move (ROM) Kit/Equipment	101 - Quartermaster (Individual)	Approved
		Supervise Petroleum Operations using Refuel on the Move (ROM) Equipment	101 - Quartermaster (Individual)	Approved
		Direct Petroleum Operations using Refuel on the Move (ROM) Kit/Equipment	101 - Quartermaster (Individual)	Approved
	101-FR8-9016	Manage Loading and Unloading of Petroleum Tank Vehicles	101 - Quartermaster (Individual)	Approved

Supporting Drill(s): None

Supported AUTL/UJTL Task(s):

Environment: Environmental protection is not just the law but the right thing to do. It is a continual process and starts with deliberate planning. Always be alert to ways to protect our environment during training and missions. In doing so, you will contribute to the sustainment of our training resources while protecting people and the environment from harmful effects. Refer to the current Environmental Considerations manual and the current GTA Environmental-related Risk Assessment card. It is the responsibility of all Soldiers and Department of the Army civilians to protect the environment from damage.

Safety: In a training environment, leaders must perform a risk assessment in accordance with current Risk Management Doctrine. Leaders will complete the current Deliberate Risk Assessment Worksheet in accordance with the TRADOC Safety Officer during the planning and completion of each

task and sub-task by assessing mission, enemy, terrain and weather, troops and support available-time available and civil considerations, (METT-TC). Note: During MOPP training, leaders must ensure personnel are monitored for potential heat injury. Local policies and procedures must be followed during times of increased heat category in order to avoid heat related injury. Consider the MOPP work/rest cycles and water replacement guidelines IAW current CBRN doctrine. Leaders must verify the structural soundness of all training and evaluation plans from a safety viewpoint. Leaders must conduct training at levels consistent with the abilities of the Soldiers being trained. They must instill an awareness of individual safety in all subordinate leaders and Soldiers. Soldiers must constantly be alert for and avoid situations that may result in injury or death. At the training site, leaders must establish training safety overview procedures. Safety procedures should emphasize the adherence to standards, consideration of environmental factors (for example wet bulb), risk assessment, and factors contributing to and aiding in the prevention of accidents. Responsible individuals must know how to balance the risks against the training requirements and monitor conditions for safety and health hazards (to eliminate or control them). Leaders must ensure the welfare of their soldiers in all situations. Leaders must establish a buddy system for safety. Soldiers should maintain a safety watch on each other, with emphasis on individual safety training, and first aid responsibilities. All unsafe conditions and unsafe acts must be recognized and reported. Soldiers must be alert to human error and know the capabilities and limitations of the equipment and vehicles they use. Following the proper safety procedures preserves troop strength by preventing personnel losses through accidents.
