Training and Evaluation Outline Report

Status: Approved 03 Aug 2017 Effective Date: 23 Sep 2020

Task Number: 10-BN-1022

Task Title: Operate the Bulk Petroleum Support Area of Logistics Operations Center

Distribution Restriction: Approved for public release; distribution is unlimited.

Destruction Notice: None

Foreign Disclosure: FD1 - This training product has been reviewed by the training developers in coordination with the CASCOM, Fort Lee, Virginia foreign disclosure officer. This training product can be used to instruct international military students from all approved countries without restrictions.

	FM 6-0	COMMANDER AND STAFF ORGANIZATION AND OPERATIONS (THIS ITEM IS PUBLISHED W/ BASIC INCL C1 AND C2)	Yes	No	

Conditions:

The battalion staff receives an operations order (OPORD) from higher headquarters (HQ) to operate the bulk petroleum support area of the logistics operations center. The battalion staff is established and operational to support the higher HQ directed mission. The battalion staff has primary access to main supply routes, approved external logistical support, and it is accessible to all supported and supporting customers/units. Continuous digital and analog communications are established and maintained. The Army, joint, and host nation applicable regulations, approved internal and external tactical standard operating procedures (TSOP), technical manuals (TMs), and field manuals (FMs) are on-hand as reference material. The battalion staff has been provided guidance on rules of engagement for this mission and are continuously receiving updates as situations and mission requirements change. Threat capabilities include opposing forces which have the ability to gather information, interact with hostile force sympathizers, coordinate suicide bombings, set up improvised explosive devices, coordinate air support, and execute reinforced platoon/squad operations in a chemical, biological, radiological, and nuclear (CBRN) environment. Mission, enemy, terrain and weather, troops and support available-time available and civil considerations (METT-TC) identified constraints must be considered. The battalion staff is not likely to be attacked with hostile enemy fire or chemical agents. This task will be performed under either/or a combination of a static, dynamic, complex, single, or hybrid operational environment as outlined in the training evaluation matrix. All authorized equipment is on hand and operational. All battalion support personnel are available to provide support during all day and night operations. Specified time constraints are identified in the operations order. The battalion staff has adequate time to prepare. Unit leaders are present in the area of operations to provide further guidance as necessary. Some iter

Standards: The battalion staff operates the bulk petroleum support area of the logistics operations center with the use of all available equipment and personnel within the specified time constraints in the mission OPORD and in accordance with (IAW) the approved Army standards identified in the Task Evaluation Criteria Matrix and in the collective task performance steps which are included in this task below, commanders guidance, applicable internal and external TSOPs, and approved Army regulations.

LEADER STATEMENT: For the purpose of this task, an Army leader is defined as a Soldier who is in a senior officer, warrant officer, and/or noncommissioned officer (NCO) position designated by grade, paragraph, and title on the units Table of Organization and Equipment (TOE). Leaders are not only defined as officers, warrant officers, noncommissioned officers, and Army civilians in leadership positions but also include individuals who are Subject Matter Experts (SME) which possess the requisite knowledge and skill set to perform a particular task (For example, conduct an operation, provide logistics, or operate specific technical equipment, etc.) at the tactical through strategic level as the situation and/or mission(s) dictates. Leaders may also be personnel assigned to the unit and designated as a leader by the unit commander.

Objective Task Evaluation Criteria Matrix:

Plan	an	d Prepare		Ex	ec	ute			Ass	ess
Operation Environme	al ent	Training Environment (L/V/C)	Leaders Present at Training/Required	Present at Training/Required	External Eva	Performance Measures	Critical Performance Measures	Leader Performance Measures	Evaluator's Observed Task Proficiency Rating	Commander's Assessment
CO & BN		ng ment C)	ers nt at tequired	nt at tequired	Eval	ance ıres	al nance ures	er nance ıres	Observed iciency 1g	nder's ment
Dynamic and Complex (4+ OE Variables and Hybrid Threat)		Commander(s) or Unit Key Leader(s) work constructive training environmental STT, STX, FTX, etc.) in order to f progression to support Unit Training Training Strategy (CATS). All externations	>=85%	. 900/	\ \	>=91%		>=90%	т	Т
	Night		75-84%	>=80%	Yes	80- 90%	All	80-	T-	T-
Dynamic (Single Threat)		Commander(s) or Unit Key Leader(s) will determine if training will be conducted under live, virtual, or constructive training environmental conditions using corresponding event types (for example, STT, STX, FTX, etc.) in order to facilitate the Crawl, Walk, Run methodology of training progression to support Unit Training Management (UTM) and recommended Combined Arms Training Strategy (CATS). All external evaluations (EXEVAL's) must be conducted in a live environment.	65-74%	75-79%		65- 79%		89%	P	Р
	D		60-64%	60-74%	No	51- 64%			P-	P-
Static (Single Threat)	Day	d under live, virtual, pes (for example, yoy of training Combined Arms iducted in a live	<=59%	<=59%		<=50%	<aii< td=""><td><=79%</td><td>U</td><td>U</td></aii<>	<=79%	U	U

Remarks:

Task steps and performance measures are arranged in a logical order and are not intended to be interpreted as a "required order" for performance. These task steps and/or performance measures of collective task may not always be applicable to every unit. Prior to evaluation, coordination should be made between the evaluator, the unit itself, and the evaluated units' higher headquarters (if required) to determine the task step(s) and/or performance measure(s) that may be omitted and/or must be performed. Training begins with the execution of pre-combat checks and inspections. Training ends when designated training objectives for the particular training events or exercises are performed to Army standard. Unit leadership should conduct an After Action Report (AAR) to determine future training requirements for the unit.

Task Evaluation Criteria Matrix Operational Environment (OE) Definitions:

Static—a static training environment has aspects of operational variables needed to stimulate mission variables that are fixed throughout the unit's execution of the task.

Dynamic—a dynamic training environment has operational variables and threat Tactics, Techniques, and Procedures (TTP) for assigned countertasks that change in response to the execution of friendly force tasks.

Complex—a complex training environment requires a minimum of four—terrain, time, military (threat), and social (population)—or more operational variables; brigade and higher units require all eight operational variables to be replicated in varying degrees based on the task being trained.

Single threat—a single threat in a training environment is a conventional force, irregular force, criminal element, or terrorist force.

Hybrid threat—a hybrid threat in a training environment uses diverse and dynamic combination of conventional forces, irregular forces, terrorist forces, and criminal elements unified to achieve mutually benefitting effects.

To obtain a T or T- this task must be conducted in a dynamic and complex environment with 4 plus OE variables and a hybrid threat at night with 75% or more leaders present, greater than 80% of Soldiers present, receive a "GO" on 80% or more of the performance measures, ALL of the critical performance measures and at least 80% "GO" on the leader performance measures. Must be conducted during an external evaluation.

Task steps and measures were developed using the Plan, Prepare, Execute, and Assess (PPEA) construct to reinforce the operations process and is implied throughout the T&EO as applicable.

Notes: REPORTING ERRORS AND RECOMMENDING IMPROVEMENTS: You can help improve this collective task. If you find any errors, or if you would like to recommend any improvements to the procedures in this collective task, please let us know. The preferred method is to submit a DA Form 2028 (Recommended Changes to Publications and Blank Forms) with your recommended changes via email to usarmy.lee.tradoc.mbx.cascom-g3-collective@mail.mil. Your recommended changes will be reviewed, validated to ensure approved Army or joint doctrine supports your recommendation(s), implemented as applicable, and a reply will be furnished to you.

Safety Risk: Low

Task Statements

Cue:

The battalion staff has received an OPORD to Operate the Bulk Petroleum Support Area of Logistics Operations Center.

DANGER

Exercise extreme caution while conducting operations. If you see something unsafe, say something. Failure to do so may cause death or permanent injury to unit personnel and/or damage unit equipment.

WARNING

Soldiers must be alert to human error and know the capabilities and limitations of the equipment and vehicles they use. Following proper safety procedures preserves troop strength by preventing personnel losses through accidents.

CAUTION

The possibility of personal injury or damage to equipment that may result from long-term failure to follow correct procedures.

Performance Steps and Measures

NOTE: Assess task proficiency using the task evaluation criteria matrix.

NOTE: Asterisks (*) indicate leader steps; plus signs (+) indicate critical steps.

Asterisks () indicate leader steps, plus signs (+) indicate critical steps.		1	
STEP/MEASURE	GO	NO-GO	N/A
+ 1. Current Operations Ops/S3 Section and/or Support Operations Section personnel direct external bulk petroleum support operations.			
a. Develop shift schedules that maintain 24-hour operations.		1	
b. Conduct detailed shift change briefings.			
c. Coordinate bulk petroleum support policies and mission changes among subordinate units with Petroleum Group and supported units.			
d. Monitor subordinate units' operational stockage levels to ensure assets exceeds requirements.			
e. Direct lateral distribution of stocks and assets as driven by changing requirements and priorities in support of operations.			
f. Direct redistribution of petroleum workloads as driven by changing requirements and priorities in support of operations.			
g. Direct revision of customer lists as driven by changing requirements, workloads, and priorities.			
h. Monitor maintenance of the petroleum support situation map(s).			
i. Monitor preparation and submission of subordinate unit terrain requirement data to supporting Rear Area Operations Center.			
j. Monitor petroleum support contingency planning.			
k. Assign liaison personnel to supported units, as required.			
I. Provide, as required, operational briefings to the battalion commander that provide actual status of petroleum support to the supported units.			
+ 2. Current Operations Ops/S3 Section and/or Support Operations Section personnel coordinate petroleum operations within area of responsibility.			
a. Maintain current petroleum situation map with all unit and facility locations posted within 50 meters of actual location.			
b. Maintain current customer list that reflects changing requirements, workloads, and priorities of tactical operations.			
c. Maintain current petroleum support overlay that shows locations of petroleum support facilities and their hours of operations.			
d. Monitor Logistics Status (LOGSTAT) reports from subordinate units to determine if requirements exceed capabilities.			
e. Coordinate redistribution of stock and/or assets to accommodate changing requirements and priorities.			
f. Coordinate stock status projections with supporting Sustainment Brigade commodity managers.			
g. Disseminate petroleum mission changes to subordinate units by the most secure means.			
h. Maintain a current mission essential item chart which reflects short supply items, command controlled items, and current equipment combat losses.			
i. Coordinate reorganization requirements with Petroleum Group staff and supported units.			
+ 3. Current Operations Ops/S3 Section and/or Support Operations Section personnel maintain section reports data.			
a. Annotate information from incoming messages and reports under appropriate heading and cross-reference.			
b. Annotate in "Remarks" informal evaluation of the information, as required.			
c. Delete all obsolete information from workbook.			
d. Format workbook in accordance with TSOP.			
+ 4. Current Operations Ops/S3 Section and/or Support Operations Section personnel maintain daily staff files.			
a. Post all entries TSOP and Army Operations regulations.		1	
b. Post data immediately upon receipt or dispatch or occurrences of events.			
c. Describe accurately and concisely information or event(s) that have occurred.			
d. Specify actions taken upon receipt or dispatch of information.			
e. Maintain current file that contains material necessary to support entries in the daily staff journal.			
+ 5. Current Operations Ops/S3 Section and/or Support Operations Section personnel coordinate petroleum support with other battalion staff sections.			
a. Maintain current status of subordinate units' personnel strengths that directly affect the support mission.			
b. Maintain current status of subordinate units' supplies and equipment operational readiness that directly affect the support mission.			
+* 6. Leaders manage administrative functions as appropriate, directed, or required.			
Manage petroleum risk management assessments IAW Army regulations.		1	
b. Provide logistics status reports to higher headquarters IAW TSOP.		1	
		1	

c. Maintain communications with higher HQ and other staff sections IAW TSOP and OPORD.

d. Employ physical security measures as required.

e. Enforce Operations Security (OPSEC) procedures at all times.

f. Enforce safety regulations and established unit's internal and external TSOP's.

g. Ensure that all Army sites and operations attain and sustain 100 percent compliance with environmental laws and regulations in a climate of changing requirements to prevent a notice of violation or a fine for not complying with following host nation, local, state, federal, higher headquarters environmental directives and policies.

h. Direct destruction of unit equipment to prevent enemy use as situations dictate.

i. Ensure that Soldiers are trained and prepared to conduct mission operations in Offense, Defense,

Stability, and Defense Support of Civil Authorities (DSCA) Operations as applicable or required.

Mission(s) supported: None

MOPP 4: Sometimes

MOPP 4 Statement:

Some iterations of this task should be performed in MOPP4. At MOPP4, performance degradation factors increases planning completion times. Ensure to comply with commander's guidance and unit TSOP when conducting operations in MOPP gear.

Chemical protective clothing ensemble and field protective mask restrict movement and activities. Wear MOPP gear only when threat forces have used CBRN weapons or are likely to do so. MOPP gear should be worn during CBRN training exercises. During MOPP training, leaders must ensure personnel are monitored for potential heat injury. Local policies and procedures must be followed during times of increased heat category in order to avoid heat related injury. Consider the MOPP work/rest cycles and water replacement guidelines in accordance with chemical, biological, radiological, and nuclear (CBRN) regulations.

NVG: Never

NVG Statement:

Night vision goggles are not required to conduct this task. However, they may be required when conducting sustainment unit operations, during

Prerequisite Collective Task(s):

Environment: Environmental protection is not just the law but the right thing to do. It is a continual process and starts with deliberate planning. Always be alert to ways to protect our environment during training and missions. In doing so, you will contribute to the sustainment of our training resources while protecting people and the environment from harmful effects. Refer to the current Environmental Considerations manual and the current GTA Environmental-related Risk Assessment card.

It is the responsibility of all Soldiers and Department of the Army civilians to protect the environment from damage. Army personnel must take care of the environment; that is, practice environmental stewardship. All operations conducted on Army installations will comply with federal, state, local and host-nation environmental requirements and Army regulations. Army personnel will sustain compliance at all sites in the US and abroad, establishing good relationships with communities and regulators.

Environmental risk management consists of the following steps:

- a. Identify Hazards. Identify potential sources for environmental degradation during analysis of METT-TC factors. This requires identification of environmental hazards. An environmental hazard is a condition with the potential for polluting air, soil, or water and or destroying cultural and historical artifacts.
- b. Assess the Hazard. Analyze potential severity of environmental degradation using the Environmental Risk Assessment. Severity of environmental degradation is considered when determining the potential effect an operation will have on the environment. The risk impact value is defined as an indicator of the severity of environmental degradation. Quantify the risk to the environment resulting from the operation as extremely high, medium, or low, using the environmental risk assessment matrixes.
- c. Make Environmental Risk Decisions. Make decisions and develop measures to reduce high environmental risks.
- d. Brief Chain of Command. Brief chain of command (to include installation environmental office, if applicable), on proposed plans and pertinent high-risk environmental matrixes. Risk decisions are made at a level of command that corresponds to the degree of risk.

Safety: In a training environment, leaders must perform a risk assessment in accordance with current Risk Management Doctrine. Leaders will complete the current Deliberate Risk Assessment Worksheet in accordance with the TRADOC Safety Officer during the planning and completion of each task and sub-task by assessing mission, enemy, terrain and weather, troops and support available-time available and civil considerations, (METT-TC). Note: During MOPP training, leaders must ensure personnel are monitored for potential heat injury. Local policies and procedures must be followed during times of increased heat category in order to avoid heat related injury. Consider the MOPP work/rest cycles and water replacement guidelines IAW current CBRN doctrine.

Leaders must verify the structural soundness of all training and evaluation plans from a safety viewpoint. Leaders must conduct training at levels consistent with the abilities of the Soldiers being trained. They must instill an awareness of individual safety in all subordinate leaders and Soldiers. Soldiers must constantly be alert for and avoid situations that may result in injury or death.

Be aware of the following:

- a. At the training site, leaders must establish training safety overview procedures. Safety procedures should emphasize the adherence to standards, consideration of environmental factors (for example, wet bulb), risk assessment, and factors contributing to and aiding in the prevention of accidents. Responsible individuals must know how to balance the risks against the training requirements and monitor conditions for safety and health hazards (to eliminate or control them). Leaders must ensure the welfare of their Soldiers in all situations.
- b. Leaders must establish a buddy system for safety measures. Soldiers should maintain a safety watch on each other, with emphasis on individual safety training, and first aid responsibilities. All unsafe conditions and unsafe acts must be recognized and reported. Soldiers must be alert to human error and know the capabilities and limitations of the equipment and vehicles they use. Following the proper safety procedures preserves troop strength by preventing personnel losses through accidents.
