### **Training and Evaluation Outline Report**

Status: Approved 04 Oct 2021 Effective Date: 04 Oct 2021

Task Number: 05-DET-5170

Task Title: Provide Well Drilling Equipment Support

**Distribution Restriction:** Approved for public release; distribution is unlimited.

**Destruction Notice: None** 

**Foreign Disclosure: FD1 -** This training product has been reviewed by the training developers in coordination with the FDO MSCoE Ft Leonard Wood, MO 65473 foreign disclosure officer. This training product can be used to instruct international military students from all approved countries without restrictions.

### Supporting Reference(s):

Step Number	Reference ID	Reference Name	Required	Primary	Source Information
		RISK MANAGEMENT, with change 1 dated 8 Sep 2014	Yes	No	
	DD FORM 2678	WELL DRILLERS LOG (LRA)	Yes	No	
	NTRP 4-04.2.13/TM 3- 34.49/AFMAN 32-1072	Water-Well Drilling Operations (HTTPS://NDLS.NWDC.NAVY.MIL) (https://armypubs.us.army.mil/doctrine/DR_pubs/dr_aa/pdf/tm3_34x49_PH_Navy.pdf)	Yes	Yes	

**Conditions:** The detachment is directed to provide well drilling equipment support. A construction directive, unit Standard Operating Procedures (SOP), specifications detailing the water well requirements, and a project schedule (Gantt chart) are available. All personnel and equipment neccesary are available. Work site security is provided by another unit.

Note: The Commander must still determine at what level of training he/she would want the element to perform: crawl, walk, or run. This can only be determined after consideration as to the unit's training level.

The Commander, prior to evaluating an element in the conduct of the task, must determine if it will be conducted in a Live, Virtual, or Constructive environment; additionally, it must also be determined under which condition described below that the element will conduct the task. The selection made for this task is at a trained level of proficiency. The commander must determine which of the environments below will best suit the unit at its current proficiency level. When conducting crawl or walk level training, the unit should not increase the intensity until it has achieved the standards, at which time unit trainers should include variables that increase proficiency in all conditions.

Note: The condition statement for this task is written assuming the highest training conditions reflected on the Task Proficiency matrix required for the evaluated unit to receive a "fully trained" (T) rating.

Note: Condition terms definitions:

Dynamic Operational Environment: Three or more operational and two or more mission variables change during the execution of the assessed task. Operational variables and threat Tactics, Techniques, and Procedures (TTPs) for assigned counter-tasks change in response to the execution of Blue Forces (BLUFOR) tasks.

Complex Operational Environment: Changes to four or more operational variables impact the chosen friendly COA/mission. Brigade and higher units require all eight operational variables of Political, Military, Economic, Social, Infrastructure, Information, Physical environment, and Time (PMESII-PT) to be replicated in varying degrees based on the task being trained.

Single threat: Regular, irregular, criminal or terrorist forces are present.

Hybrid threat: Diverse and dynamic combination of regular forces, irregular forces, and/or criminal elements all unified to achieve mutually benefiting effects.

This task should not be trained in MOPP 4.

**Standards:** The detachment provides well drilling equipment support in accordance with (IAW) directives, standard operating procedures (SOP). Water well production does not impede supported unit's operations. The detachment drills the well as specified in the directive without errors.

Note: Leaders are defined as Detachment Team Leader, Horizontal Construction Supervisor.

Live Fire: No

### **Objective Task Evaluation Criteria Matrix:**

Plan and Prepare			Ex	ec	ute			Ass	ess		
Operations Environme	al ent	Training Environment (L/V/C)	Leaders Present at Training/Required	Present at Training/Required	External Eval	Performance Measures	Critical Performance Measures	Leader Performance Measures	Evaluator's Observed Task Proficiency Rating	Commander's Assessment	
Dynamic			750/	>=80%	Yes >=8	Ye	>=80%		. 959/	т	т
Dynamic (Single Threat)		IAW	>=75%	>=00%	)%	>=00%	All	>=85%	T-	T-	
	Day	IAW unit CATS statement.	60-74%	60-79%		65- 79%		. 75- 84%	P	Р	
Static (Single Threat)		ent.	60-74%	60-79%	No	65- 74%	All	84%	P-	P-	
			<=59%	<=59%		<=65%	<all< td=""><td>&lt;=74%</td><td>U</td><td>U</td></all<>	<=74%	U	U	

Remarks: None

Notes: None

Safety Risk: Low

### **Task Statements**

Cue: None

# **DANGER**

Leaders have an inherent responsibility to conduct Risk Management to ensure the safety of all Soldiers and promote mission accomplishment.

# **WARNING**

Risk management is the Army's primary decision-making process to identify hazards, reduce risk, and prevent both accidental and tactical loss. All Soldiers have the responsibility to learn and understand the risks associated with this task.

# **CAUTION**

Identifying hazards and controlling risks across the full spectrum of Army functions, operations and activities is the responsibility of all Soldiers.

### **Performance Steps and Measures**

**NOTE:** Assess task proficiency using the task evaluation criteria matrix.

NOTE: Asterisks (\*) indicate leader steps; plus signs (+) indicate critical steps.

#### STEP/MEASURE

- +\* 1. The element leader conducts Troop Leading Procedures (TLP).
- +\* 2. The element leader determines what type of well drilling support will be needed.
  - + a. Identifies specified and implied equipment support tasks.
  - + b. Identifies what type of support the supporting unit will provide.
  - + c. Identifies the date, time and location the equipment support is needed.
  - + d. Coordinates for transportation of equipment/personnel.
  - + e. Determines availability of engineering materials.
- +\* 3. The detachment leader analyzes all well intelligence reports and assembles the site information.
  - a. Determines the significant topographic features and the site history.
  - b. Conducts a field reconnaissance.
- +\* 4. The element leader develops a work site safety plan.
  - + a. Develops a risk assessment matrix.
  - + b. Appoints a work site safety Non-Commissioned Officer (NCO).
- + 5. The element provides well drilling support.
- + 6. The element performs recovery operations.
  - + a. Cleans all equipment used.
  - + b. Performs after use PMCS on equipment used to provide well drilling support.
  - c. Lubricates any parts, as necessary.
- +\* 7. The element leader supervises the well drilling support.
  - + a. Monitors overall safety of the work site.
  - b. Supervises allocation of personnel and equipment.
  - + c. Performs Quality Control (QC) functions.
  - d. Ensures replenishment of any materials that were used, if required.
- + e. Submits status reports to higher headquarters in accordance with unit Standing Operating Procedures (SOP).

**Environment:** Environmental protection is not just the law but the right thing to do. It is a continual process and starts with deliberate planning. Always be alert to ways to protect our environment during training and missions. In doing so, you will contribute to the sustainment of our training resources while protecting people and the environment from harmful effects. Refer to the current Environmental Considerations manual and the current GTA Environmental-related Risk Assessment card.

**Safety:** In a training environment, leaders must perform a risk assessment in accordance with current Risk Management Doctrine. Leaders will complete the current Deliberate Risk Assessment Worksheet in accordance with the TRADOC Safety Officer during the planning and completion of each task and sub-task by assessing mission, enemy, terrain and weather, troops and support available-time available and civil considerations, (METT-TC). Note: During MOPP training, leaders must ensure personnel are monitored for potential heat injury. Local policies and procedures must be followed during times of increased heat category in order to avoid heat related injury. Consider the MOPP work/rest cycles and water replacement guidelines IAW current CBRN doctrine.
