

551-88U-1465
Conduct Mission Crew Safety Briefing
Status: Approved

Distribution Restriction: Approved for public release; distribution is unlimited.

Destruction Notice: None

Foreign Disclosure: FD1 - This training product has been reviewed by the training developers in coordination with the Transportation School, Fort Lee, VA foreign disclosure officer. This training product can be used to instruct international military students from all approved countries without restrictions.

Conditions: Assigned as a Railway Specialist with the requirement to advise COCOM/Host Nation personnel how to coordinate a mission crew safety briefing, given PPE, references, track warrant, and a train crew, day or night, in all weather conditions, and in an operational environment. Some iterations of this task should be performed in MOPP 4.

Standards: Coordinate mission crew safety briefing without injury to personnel or damage to equipment.

Special Conditions: None

Safety Risk: Low

MOPP 4: Sometimes

Task Statements

Cue: Your train crew is tasked to advise COCOM/Host Nation personnel how to coordinate a mission crew safety briefing.

DANGER

None

WARNING

None

CAUTION

Working around live tracks is always dangerous. Follow all safety procedures outlined in the GCOR. and ATP 4-14

Remarks: None

Notes: None

Performance Steps

1. Identify scope and details of work to be done during job briefing.
 - a. Switching
 - b. Spotting
 - c. Picking-up
 - d. Setting-out
 - e. Number of railcar(s)
 - f. Commodity(ies)
 - g. Loads / MTs
 - h. Tonnage
 - i. Train length
2. Identify how the work is to be done.
 - a. Define crewmembers' general area of responsibility.
 - (1) Engineer – Operates the locomotive.
 - (2) Conductor/Foreman, the conductor supervises the operation and administration of the train.
 - (3) Brakeman/Switchman, Takes orders from conductor/foreman.
 - (4) Utility man – assist as directed by yardmaster after directed.
 - b. Define crewmember specific tasks.
 - (1) Line switches
 - (2) Handle derails
 - (3) Handle gates and doors
 - (4) Handbrakes
 - (5) Close clearances
 - (6) Shoving stub tracks
 - (7) Other duties as assigned.
3. Identify why the work has to be done in a specific manner.
 - a. Customer requirement
 - b. Handling HAZMAT
 - c. Yardmasters instructions
 - d. Transportation Plan

- e. Work Order
 - f. Special Instructions
4. Identify when the work is to be done.
 - a. After arrival of train(s).
 - b. After another job is finished.
 - c. As directed.
 - d. Immediately.
 5. Identify where the work is to be done.
 - a. Mainline
 - b. Industry track
 - c. Yard track
 6. Identify who will do the work.
 7. Identify environmental conditions and special situations.
 8. Direct each individual involved to back-brief his/her duties.

(Asterisks indicates a leader performance step.)

Evaluation Guidance: Mark each performance measure either GO or NO-GO. The Soldier must complete all steps to receive a GO for each measure. All measures must be marked GO to receive an overall GO on the task. If the Soldier fails any performance measure, show what was done wrong and how to do it correctly.

Evaluation Preparation: Ensure that all materials required to perform the task are available. Tell the Soldier that he/she will be evaluated on coordinating mission crew safety briefing.

PERFORMANCE MEASURES	GO	NO-GO	N/A
1. Identified scope and details of work to be done during job briefing.			
2. Identified how the work was to be done.			
3. Identified why the work had to be done in a specific manner.			
4. Identified when the work was to be done.			
5. Identified where the work was to be done.			
6. Identified who would do the work.			
7. Identified environmental conditions and special situations.			
8. Directed each individual involved to back-brief his/her duties.

No materiel items specified				

Environment: Environmental protection is not just the law but the right thing to do. It is a continual process and starts with deliberate planning. Always be alert to ways to protect our environment during training and missions. In doing so, you will contribute to the sustainment of our training resources while protecting people and the environment from harmful effects. Refer to the current Environmental Considerations manual and the current GTA Environmental-related Risk Assessment card.

AR 200-1 delineates TRADOC responsibilities to integrate environmental requirements across DOTMLPF and ensures all training procedures, training manuals, and training doctrine includes sound environmental practices and considerations. The Army's environmental vision is to be a national leader in environmental and natural resource stewardship for present and future generations as an integral part of all Army missions. Environmental protection is never completed. Continuously be alert to ways to protect our environment and reduce waste. Leaders must ensure that their unit has an active and strong environmental program. They must understand the laws and know what actions to take.

Leaders bring focus, direction, and commitment to environmental protection. Commanding officers should ensure the following environmental programs are in place and are being maintained:

- Hazardous materials program.
- Hazardous waste program.
- Hazardous communications program.
- Pollution prevention and hazardous waste minimization recycling program.
- Spill prevention and response plan program.

Safety: In a training environment, leaders must perform a risk assessment in accordance with current Risk Management Doctrine. Leaders will complete the current Deliberate Risk Assessment Worksheet in accordance with the TRADOC Safety Officer during the planning and completion of each task and sub-task by assessing mission, enemy, terrain and weather, troops and support available-time available and civil considerations, (METT-TC).

Note: During MOPP training, leaders must ensure personnel are monitored for potential heat injury. Local policies and procedures must be followed during times of increased heat category in order to avoid heat related injury. Consider the MOPP work/rest cycles and water replacement guidelines IAW current CBRN doctrine.

All operations will be performed to protect and preserve Army personnel and property against accidental loss. Procedures will provide for public safety incidental to Army operations and activities and safe and healthful workplaces, procedures, and equipment. Observe all safety and/or environment precautions regarding electricity, cable, and lines. Provide ventilation for exhaust fumes during equipment operation and use hearing protection when required IAW AR 385-10, the Clean Air Act (CAA) and the CAA amendments, and the OSHA Hazard Communication standard.

Accidents are an unacceptable impediment to Army missions, readiness, morale, and resources. Decision makers at every level will employ risk management approaches to effectively preclude unacceptable risk to the safety of personnel and property affiliated with this task.

- (a) Take personal responsibility.
- (b) Practice safe operations.
- (c) Recognize unsafe acts and conditions.
- (d) Take action to prevent accidents.
- (e) Report unsafe acts and conditions.
- (f) Work as a team.
