Training and Evaluation Outline Report

Status: Approved 09 Mar 2017 Effective Date: 26 Aug 2020

Task Number: 10-PLT-7014

Task Title: Conduct Petroleum Support Operations

Distribution Restriction: Approved for public release; distribution is unlimited.

Destruction Notice: None

Foreign Disclosure: FD3 - This training product has been reviewed by the developers in coordination with the CASCOM, Fort Lee, Virginia

foreign disclosure officer. This training product cannot be used to instruct international military students.

	FM 4-95	Logistics Operations http://armypubs.army.mil/doctrine/DR_pubs/ dr_a/pdf/fm4_95.pdf	Yes	No	
	FM 7-0	Train to win in a Complex World	Yes	No	
	PAM 710-2-1	USING UNIT SUPPLY SYSTEM (MANUAL PROCEDURES)	Yes	No	
	PAM 710-7	HAZARDOUS MATERIAL MANAGEMENT PROGRAM	Yes	No	

Conditions: The unit petroleum support operations element receives an operations order (OPORD) from higher headquarters (HQ) to coordinate the petroleum operations of a petroleum support company and subordinate elements. The element is established and operational to support the higher HQ directed mission. The element has primary access to main supply routes, approved external logistical support, and it is accessible to all supported and supporting customers/units. Continuous digital and analog communications are established and maintained. All Army, joint, and host nation applicable regulations, approved internal and external tactical standard operating procedures (TSOP), technical manuals (TMs), and field manuals (FMs) are on-hand as reference material. The element has been provided guidance on rules of engagement for this mission and are continuously receiving updates as situations and mission requirements change. Threat capabilities include opposing forces which have the ability to gather information, interact with hostile force sympathizers, coordinate suicide bombings, set up improvised explosive devices, coordinate air support, and execute reinforced platoon/squad operations in a chemical, biological, radiological, and nuclear (CBRN) environment. Mission, enemy, terrain and weather, troops and support available-time available and civil considerations (METT-TC) identified constraints must be considered. The element is not likely to be attacked with hostile enemy fire or chemical agents. This task will be performed under either/or a combination of a static, dynamic, complex, single, or hybrid operational environment as outlined in the training evaluation matrix. All authorized equipment is on hand and operational. The element has all assigned personnel and they are available to provide support during all day and night operations. Specified time constraints are identified in the operations order. The element has adequate time to prepare and meet the timeline in the OPORD. Unit leaders are present in the area

guidance as necessary. Some iterations of this task should be performed in MOPP 4.

Standards: The unit petroleum support operations element conducts petroleum support operations functions with the use of all available equipment and personnel within the specified time constraints in the mission OPORD and in accordance with (IAW) the approved Army standards identified in the Task Evaluation Criteria Matrix which is included in this task below, commanders guidance, applicable internal and external TSOPs, and approved Army regulations.

LEADER STATEMENT: An Army leader is anyone who by virtue of assumed role or assigned responsibility inspires and influences people to accomplish organizational goals. Leadership is not limited to or synonymous with an assigned duty, position, or given rank as it also manifests itself in both informal and collective forms. Informal leadership provides knowledge, experience, and technical expertise while collective leadership results through the combined effects and synergies of leaders at different levels and experience collaborating to achieve a common purpose. Informal and collective leadership can include positions with an expanded scope of responsibility, significance and operational / mission implications. Therefore, for the purpose of training this task, Leaders are not only defined as officers, warrant officers, noncommissioned officers, and Army civilians but also include individuals who are Subject Matter Experts (SME) which possess the requisite knowledge and skill set to perform a particular task (For example, conduct an operation, provide logistics, or operate specific equipment, etc.) at the tactical through strategic level as the situation and/or mission(s) dictates.

Live Fire: No

Objective Task Evaluation Criteria Matrix:

Plan	ar	d Prepare	Execute					Assess		
Operation Environme	al	Training Environment (L/V/C)	Leaders Present at Training/Required	Present at Training/Required	External Eval	Performance Measures	Critical Performance Measures	Leader Performance Measures	Evaluator's Observed Task Proficiency Rating	Commander's Assessment
Dynamic		Commander(s) or L or constructive trai STT, STX, FT progression to su Training Strategy (>=85%	>=80%	Yes	>=91%		>=90%	т	т
(Single Threat)	Night	Init Key Leader(s) v ning environmental X, etc.) in order to f pport Unit Training CATS). Per FM 7-0,	75-84%	>=00/6	is,	80- 90%	All	80-	T-	T-
		Commander(s) or Unit Key Leader(s) will determine if training will be conducted under live, virtual, or constructive training environmental conditions using corresponding event types (for example, STT, STX, FTX, etc.) in order to facilitate the Crawl, Walk, Run methodology of training progression to support Unit Training Management (UTM) and recommended Combined Arms Training Strategy (CATS). Per FM 7-0, all external evaluations (EXEVAL's) must be conducted in a live environment.	65-74%	75-79%		65- 79%		89%	Р	Р
Static (Single Threat)	D	ing will be conducte rresponding event the Valk, Run methodolical and recommended ions (EXEVAL's) mu	60-64%	60-74%	No	51- 64%			P-	P-
Day	ay	d under live, virtual, ypes (for example, ogy of training I Combined Arms I st be conducted in	<=59%	<=59%		<=50%	<all< td=""><td><=79%</td><td>U</td><td>U</td></all<>	<=79%	U	U

Remarks: Task steps and performance measures are arranged in a logical order and are not intended to be interpreted as a "required order" for performance. These task steps and/or performance measures of collective task may not always be applicable to every unit. Prior to evaluation, coordination should be made between the evaluator, the unit itself, and the evaluated units' higher headquarters (if required) to determine the task step(s) and/or performance measure(s) that may be omitted and/or must be performed. Training begins with the execution of pre-combat checks and inspections. Training ends when designated training objectives for the particular training events or exercises are performed to Army standard. Unit leadership should conduct an after action report (AAR) to determine future training requirements for the unit.

Task Evaluation Criteria Matrix Definitions:

Static: Aspects of operational variables (PMESII-PT) needed to stimulate mission variables (METT-TC) are fixed throughout the unit's execution of the task.

Dynamic: Operational variables and Threat TTPs for assigned counter- tasks change in response to the execution of BLUFOR's task.

Complex: Requires a minimum of four (Terrain, Time, Military [Threat], and Social [Population]) or more operational variables; brigade and higher units require all eight operational variables (PMESII-PT) to be replicated in varying degrees based on the task being trained.

Single Threat: Regular, irregular, criminal, or terrorist.

Hybrid Threat: The diverse and dynamic combination of regular forces, irregular forces, terrorist forces, and/or criminal elements unified to achieve mutually benefitting effects.

To obtain a T or T- this task must be conducted in a dynamic and complex environment with 4 plus OE variables and a hybrid threat at night with 75% or more leaders present, greater than 80% of Soldiers present, receive a "GO" on 80% or more of the performance measures, ALL of the critical performance measures and at least 80% "GO" on the leader performance measures. Must be conducted during an external evaluation.

Task steps and measures were developed using the Plan, Prepare, Execute and Assess (PPEA) construct to reinforce the operations process and is implied throughout the T&EO as applicable.

Notes: REPORTING ERRORS AND RECOMMENDING IMPROVEMENTS: You can help improve this collective task. If you find any errors, or if you would like to recommend any improvements to the procedures in this collective task, please let us know. The preferred method is to submit a DA Form 2028 (Recommended Changes to Publications and Blank Forms) with your recommended changes via email to usarmy.lee.tradoc.mbx.cascom-g3-collective@mail.mil. Your recommended changes will be reviewed, validated to ensure approved Army or joint doctrine supports your recommendation(s), implemented as applicable, and a reply will be furnished to you.

Safety Risk: Low

Task Statements

Cue: The petroleum support operations personnel received an OPORD to coordinate the petroleum missions of a petroleum support company and subordinate elements.

DANGER

Soldiers must constantly be alert for and avoid situations that may result in injury or death. At the training site, leaders must establish training safety overview procedures.

WARNING

Soldiers must be alert to human error and know the capabilities and limitations of the equipment and vehicles they use. Following the proper safety procedures preserves troop strength by preventing personnel losses through accidents.

CAUTION

The possibility of personal injury or damage to equipment that may result from long-term failure to follow correct procedures.

Performance Steps and Measures

NOTE: Assess task proficiency using the task evaluation criteria matrix.

 $\textbf{NOTE:} \ \, \mathsf{Asterisks} \ \, (^*) \ \, \mathsf{indicate} \ \, \mathsf{leader} \ \, \mathsf{steps}; \ \, \mathsf{plus} \ \, \mathsf{signs} \ \, (+) \ \, \mathsf{indicate} \ \, \mathsf{critical} \ \, \mathsf{steps}.$

CTED/MEA CLIDE	00	NO CO	NI/A
STEP/MEASURE	GO	NO-GO	N/A
+ 1. Petroleum Support Operations Personnel, Operations Officer, Petroleum Systems Technician, and/or Petroleum Operations Sergeant direct petroleum support operations.			
a. Plan missions for the assigned petroleum support company.			
b. Task petroleum support company elements as required to support mission and ORORD.			
c. Maintain communications with higher headquarters to forecast support requirements.			
d. Provide status report(s) to higher headquarters IAW internal and external unit TSOP's.			
e. Plan all operations to comply with national, state, local and host nation environmental protection aws.			
f. Identify petroleum system requirements.			
g. Enforce petroleum quality surveillance program.			
+ 2. Petroleum Operations personnel coordinate the management of bulk petroleum.			
a. Coordinate the receipt, storage, and issue of bulk petroleum.			
b. Coordinate the delivery of bulk petroleum by organic fuel dispensing vehicles to local high rolume use customers.			
c. Maintain petroleum availability and stock location data.			
d. Coordinate the delivery of bulk petroleum.			
e. Ensure that hazardous substances are stored and turned in, in accordance with local policies and applicable environmental regulations.			
f. Coordinate with higher headquarters and supported units for delivery of regularly scheduled betroleum, oils, and lubricants (POL) push-packages.			
+ 3. Petroleum Operations personnel plan movement of petroleum products.			
a. Validate the availability of required petroleum product prior to transportation being coordinated.			
b. Identify transportation requirements for petroleum products that must be transported.			
c. Coordinate movement of petroleum products through internal, external, or higher headquarters as needed.			
d. Identify method of transportation for petroleum products.			
e. Coordinate movement of petroleum products by means other than pipeline with transportation assets.			
f. Provide transportation schedule(s) for distribution of bulk petroleum products to supported/supporting units/elements as required.			
g. Forward schedules to dispatchers in subordinate units.			
+ 4. Petroleum Support Operations personnel ensure environmental procedures are implemented.			
a. Ensure that petroleum personnel are properly trained on handling environmental issues.			
b. Implement a spill prevention, control and countermeasure plan (SPCCP) which identifies fuel storage locations for potential spill sites and those measures taken to prevent a spill from occurring.			
c. Implement a spill contingency plan (SCP) required in conjunction with the SPCCP which dentifies who to contact in the event a spill does occur.			
d. Track environmental spills as they occur.			
e. Coordinate with higher HQ to ensure proper procedures are followed IAW applicable environmental regulations.			
f. Report hazardous materials and hazardous waste spills immediately to higher headquarters or appropriate environmental agency as required.			
g. Ensure that all Army petroleum sites and operations attain and sustain 100 percent compliance with environmental laws and regulations in a climate of changing requirements to prevent a notice of violation or a fine for not complying with following host nation, local, state, federal, higher headquarters environmental directives and policies.			
* 5. Petroleum Support Operations Leaders manage administrative functions as appropriate, directed, or equired.			
a. Conduct troop leading procedures as required IAW Army regulations.			
b. Manage risk management assessments IAW Army regulations.			
c. Provide logistics status reports to higher HQ IAW TSOP.			
d. Maintain communications with higher HQ and subordinate elements IAW internal and external TSOP.			
e. Employ physical security measures as required.			
f. Enforce operations security (OPSEC) procedures at all times.			
g. Enforce safety regulations and established unit's internal and external TSOP's.			
h. Direct destruction of unit equipment to prevent enemy use as situations dictate.			
i. Ensure that Soldiers are trained to conduct mission operations in Offense, Defense, Stability, and

Mission(s) supported: None

MOPP 4: Sometimes

MOPP 4 Statement: Some iterations of this task should be performed in MOPP4. At MOPP4, performance degradation factors increases planning completion times. Ensure to comply with commander's guidance and unit TSOP when conducting operations in MOPP gear.

Chemical protective clothing ensemble and field protective mask restrict movement and activities. Wear MOPP gear only when threat forces have used CBRN weapons or are likely to do so. MOPP gear should be worn during CBRN training exercises. During MOPP training, leaders must ensure personnel are monitored for potential heat injury. Local policies and procedures must be followed during times of increased heat category in order to avoid heat related injury. Consider the MOPP work/rest cycles and water replacement guidelines in accordance with chemical, biological, radiological, and nuclear (CBRN) regulations.

NVG: Sometimes

NVG Statement: Night vision goggles are not required to conduct this task. However, they may be required when conducting sustainment unit operations, during movement, or Soldier duties as assigned.

Prerequisite Collective Task(s):

Step Number	Task Number	Title	Proponent	Status
	10-CO-1011	Establish Petroleum Support Company Operations	10 - Quartermaster (Collective)	Approved

Supporting Collective Task(s):

Step Number	Task Number	Title	Proponent	Status
	10-CO-1015	Conduct Petroleum Support Company Operations	10 - Quartermaster (Collective)	Approved

OPFOR Task(s): None

Supporting Individual Task(s):

Step Number	Task Number	Title	Proponent	Status
	101-23A-6001	Implement Bulk Petroleum Quality Surveillance Programs (Brigade and Below)	101 - Quartermaster (Individual)	Approved
	101-92A-8064	Prepare Monthly Bulk Petroleum Accounting Summary	101 - Quartermaster (Individual)	Approved
	101-92F-9004	Direct Petroleum Operations	101 - Quartermaster (Individual)	Approved

Supporting Drill(s): None

No materiel items specified			

Environment: Environmental protection is not just the law but the right thing to do. It is a continual process and starts with deliberate planning. Always be alert to ways to protect our environment during training and missions. In doing so, you will contribute to the sustainment of our training resources while protecting people and the environment from harmful effects. Refer to the current Environmental Considerations manual and the current GTA Environmental-related Risk Assessment card. It is the responsibility of all Soldiers and Department of the Army civilians to protect the environment from damage. Army personnel must take care of the environment; that is, practice environmental stewardship. All operations conducted on Army installations will comply with federal, state, local and host-nation environmental requirements and Army regulations. Army personnel will sustain compliance at all sites in the US and abroad, establishing good relationships with communities and regulators.

Environmental risk management consists of the following steps:

- a. Identify Hazards. Identify potential sources for environmental degradation during analysis of METT-TC factors. This requires identification of environmental hazards. An environmental hazard is a condition with the potential for polluting air, soil, or water and or destroying cultural and historical artifacts.
- b. Assess the Hazard. Analyze potential severity of environmental degradation using the Environmental Risk Assessment. Severity of environmental degradation is considered when determining the potential effect an operation will have on the environment. The risk impact value is defined as an indicator of the severity of environmental degradation. Quantify the risk to the environment resulting from the operation as extremely high, medium, or low, using the environmental risk assessment matrixes.
- c. Make Environmental Risk Decisions. Make decisions and develop measures to reduce high environmental risks.

d. Brief Chain of Command. Brief chain of command (to include installation environmental office, if applicable), on proposed plans and pertinent high-risk environmental matrixes. Risk decisions are made at a level of command that corresponds to the degree of risk.

Safety: In a training environment, leaders must perform a risk assessment in accordance with current Risk Management Doctrine. Leaders will complete the current Deliberate Risk Assessment Worksheet in accordance with the TRADOC Safety Officer during the planning and completion of each task and sub-task by assessing mission, enemy, terrain and weather, troops and support available-time available and civil considerations, (METT-TC). Note: During MOPP training, leaders must ensure personnel are monitored for potential heat injury. Local policies and procedures must be followed during times of increased heat category in order to avoid heat related injury. Consider the MOPP work/rest cycles and water replacement guidelines IAW current CBRN doctrine.

Leaders must verify the structural soundness of all training and evaluation plans from a safety viewpoint. Leaders must conduct training at levels consistent with the abilities of the Soldiers being trained. They must instill an awareness of individual safety in all subordinate leaders and Soldiers. Soldiers must constantly be alert for and avoid situations that may result in injury or death.

Be aware of the following:

- a. At the training site, leaders must establish training safety overview procedures. Safety procedures should emphasize the adherence to standards, consideration of environmental factors (for example, wet bulb), risk assessment, and factors contributing to and aiding in the prevention of accidents. Responsible individuals must know how to balance the risks against the training requirements and monitor conditions for safety and health hazards (to eliminate or control them). Leaders must ensure the welfare of their Soldiers in all situations.
- b. Leaders must establish a buddy system for safety measures. Soldiers should maintain a safety watch on each other, with emphasis on individual safety training, and first aid responsibilities. All unsafe conditions and unsafe acts must be recognized and reported. Soldiers must be alert to human error and know the capabilities and limitations of the equipment and vehicles they use. Following the proper safety procedures preserves troop strength by preventing personnel losses through accidents.
